/clone lib="MIH MGC 192"
/clone Tib="MIH MGC 192"
/clone Tib="Wellon: pExpress; Site_1: Smal; Site_2: NotI; The library was constructed by reverse transcription of 1 ug mRNA using the oligo dT primer GCGCCGCC(T) 20 and an RNaseH + MMLV reverse transcriptase. Second strand synthesis was carried out by standard methods. The cDNA was size selected by agarose gel for > 1.2 kb, digested with Not I and directionally cloned into the vector Express-1 at the Small/NotI sites. DNA from the primary library was used for in vitro transcription from the T7 promother to produce biotinylated RNA transcripts. These biotinylated transcripts, along with blocking oligos to the poly-A, multiple cloning site and primer regions, were hybridized with single stranded circles produced by phagmeid production from the primary library to a Cot value of 10-20. Strepavidin/phenol extraction was utilized stransformed back into E. coli resulting in the normalized library. Average insert size 2.0 kb. 3
linker/adaptor sequence GCGCCCCC(T) 20. This libary was

Est strand cDNA was primed with a NotI-oligo(dT) primer. Five prime end enriched, double-strand cDNA with a NotI-oligo(dT) primer. Five prime into the Not I and EcoR V sites of the pcMVSPORT 6 vector. Library was normalized. Library was constructed by Life Technologies, a division of Invitrogen. This sequence belongs to sequence cluster

1st strand cDNA was primed with a NotI-oligo(dT) primer. Five prime
end enriched, double-strand cDNA was digested with Not I and cloned
into the Not I and EcoR V sites of the pCMVSPORT 6 vector. Library
was normalized. Library was constructed by Life Technologies, a
division of Invitrogen. This sequence belongs to sequence cluster
3485.f

1st strand cDNA was primed with a NotI-oligo(dT) primer. Five prime end enriched, double-strand cDNA was digested with Not I and cloned into the Not I and EcoR V sites of the pCMVSpORT 6 vector. Library was normalized. Library was constructed by Life Technologies, a division of Invitrogen. This sequence belongs to sequence cluster
                                                                                                                                                                                                                                                                                                                                                                                                                                                AL527566

1st strand cDNA was primed with a NotI-oligo(dT) primer. Five end enriched, double-strand cDNA was digested with Not I and into the Not I and Ecok V sites of the pCMVSPORT 6 vector. Liwas normalized. Library was constructed by Life Technologies, division of Invitrogen.

                                                                                                                                                                                                                                                                                                            1st strand cDNA was primed with a NotI-oligo(dT) primer. Five prime end enriched, double-strand cDNA was digested with Not I and cloned into the Not I and EcoR V sites of the pCMVSPORT 6 vector. Library was normalized. Library was constructed by Life Technologies, a

1st strand cDNA was primed with a NotI-oligo(dT) primer. Five prime
end enriched, double-strand cDNA was dispetted with Not I and cloned
into the Not I and EcoR V sites of the pCMVSPORT 6 vector. Library
was normalized. Library was constructed by Life Technologies, a
division of Invitrogen. This sequence belongs to sequence cluster

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  22
                                                                               Ingolstaedter Landstr.1, D-85764 Neuherberg, Germany This is the 5' sequence of the clone insert Clone from S. Wieman Molecular Genome Analysis, German Cancer Research Center (DKFZ) Email s. wiemann@dkfz-heidelberg.de; sequenced by Qiagen (Hilden/Germany) within the cDNA sequencing consortium of the German Genome Project. This clone (DKFZp469E1232) is available the RZPD in Berlin. Please contact the RZPD: Ressourcenzentrum, Heubnerweg 6, 14059 Berlin-Charlottenburg, GERMANY; Email: clone@rzpd.de Further information about the clone and the sequencing project is available at http://mips.gsf.de/projects/cdna/.

1st strand cDNA was primed with a NotI-oligo(dT) primer. Five prime
end enriched, double-strand cDNA was digested with Not I and cloned
into the Not I and EcoR V sites of the pcMVSPORT 6 vector. Library
was normalized. Library was constructed by Life Technologies, a
division of Invitrogen. This sequence belongs to sequence cluster
                                                                                                                                                                                 Eukaryota; Metazoa; Chordata; Craniata; Vertebrata; Euteleostomi; Mammalla; Eutheria; Primates; Catarrhini; Hominidae; Homo.
